Notes from the D11 Education Chair

I urge all D11 board members to--participate in and disseminate information to their constituents--about the Friday Evening Stakeholder's Meeting. This is an important way to affect change within D11. As evidenced above, 3 units did not participate and another 2 units had minimal participation. These meetings serve to design and shape the support D11 provides. Who among you does not need help in attracting and retaining new members? It is in everyone's best interest to participate as fully as possible. I also see the need to find a source of funding for D11 Ed.. This money would help support units in implementing the new and innovative education programs required by an increasingly diverse and complex market.
